Education

B.tech Computer Science, *Jecrc University*   08/2019 – 05/2023
CGPA: 79.9   Jaipur, India

Professional Experience

Front End Developer   01/2023 – 07/2023
As a front-end developer at Socialveins, I am responsible for creating engaging and   Jaipur, India
user-friendly web interfaces for an AI-powered platform that connects brands and
startups with regional and vernacular influencers. I use my skills in HTML, CSS,
JavaScript, and React to design and develop responsive web pages that showcase
the features and benefits of Socialveins' influencer marketing tool. I also collaborate
with the back-end developers and the product managers to ensure the functionality
and performance of the web application.
